ACHIEVEMENTS

- Rising star in WIPRO Q4-2022
- Was part of NIT Rourkela Hacksagon 2023
- Top Performers in 2023

EDUCATION

Bachelor of Technology

GL Bajaj Group Of Institutions, Mathura

2017 - 2021

SKILLS

- **Languages**: Kotlin, Java

- **Development Tools**: Android Studio

- **Frameworks & Libraries**: Android Jetpack, Retrofit, Room, Dagger Hilt , Coroutines

- **Version Control**: Git

- **UI/UX Design**:Material Design principles, responsive layouts

- **CI/CD Pipeline:** Jenkins

LANGUAGES

- Hindi
- English

OTHER PROJECTS

Hello NITR App (*NIT Rourkela*)

- Was part of NIT Rourkela Hacksagon and developed an app that bridges the communication gap between faculty and students.
- Made sure the app runs smoothly and handles data efficiently.

JCB App

- Also worked on a JCB app as a freelancer, focusing on design, backend, and user authentication.
- Used Java, Android Studio, and Firebase to build a seamless and user-friendly experience.

OraFinance Field App

- Led the entitre development of the OraFinance Field App for customer onboarding in loan services.
- Utilized MVVM architecture for a clean and maintainable codebase.
- Implemented Coroutines for efficient background processing.
- Integrated REST APIs using Retrofit and managed dependencies with Dagger Hilt.
- Enhanced data management with Room Database.
- Streamlined the onboarding process for field agents, improving efficiency and customer interactions.

WIPRO Technologies (Gurugram) Aug 2021 - Feb 2023
SDET (Software Development Engineer in Test)

- Designed, developed, and maintained automated test scripts using Java Selenium framework.
- Integrated automated tests with the CI/CD pipeline to ensure continuous testing.
- Ensured that the automation coverage includes functional, regression, performance, and load testing.
- Worked closely with developers to understand the architecture and design of the software.
- Write and maintain code to support the development and automation of testing processes.

LogicLadder Technologies (Gurugram) March 2021 - July 2021
Android App Developer (*Intern*)

- Contributed to developing an Android app for a sustainability management technology company.
- Built user interfaces, integrated APIs, and implemented a secure payment gateway.
- Worked under the guidance of senior developers to enhance app functionality.
