WORK EXPERIENCE

● QueueBuster (NOIDA)

Oct 2024 - Present

Mobile App Developer

Self-Service Kiosk App

- Led the development of a **Flutter-based** self-service kiosk app for renowned restaurant chains like **Chili's and McDonald's**, enhancing order efficiency and customer experience.

IoT-Enabled Check-In System

- Engineered a Android Based smart check-in system with **IoT-controlled** flap barriers for **Wonderla**, a leading amusement park chain, ensuring seamless and secure guest entry.

QueueBuster Pos App (Android Native)

- Worked on integrating **PineLabs'** different payment methods including **PineLabs cloud, Card, UPI**.
- Worked on improving current **architecture** by introducing latest **design patterns**.

QueueBuster Pos App (Flutter)

- Set up the base for the new flutter based **QueueBuster Pos App** using low level desing patterns.
- Followed **Repository pattern**, and **UseCases** for maintainability and testability.

● Unnati AgriTech (NOIDA)

Feb 2023- Oct 2024

Android App Developer

Ora Finance Loan App (Android)

- Designed and implemented scalable architecture using **MVVM, Repository pattern, and UseCases** for maintainability and testability.
- Integrated secure **E-Mandate** flows for auto-debit using **Razorpay** and **NPCI** guidelines.
- Implemented full **KYC** process including **Aadhaar-based** verification and **PAN** validation via APIs
- Used **Retrofit, Coroutines, and Hilt** for efficient data flow and dependency management

U-Store App (Android)

- Migrated legacy **Java code to Kotlin** in U-Store app (100K+ downloads).
- Enhanced API efficiency and moved from **SQLite** to **RoomDB**.
- Refactored core modules to adopt modern **Kotlin features, reducing boilerplate** and improving code readability

● WIPRO Technologies (Gurugram)

December 2021 - Feb 2023

SDET (Software Development Engineer in Test)

- Designed, developed, and maintained automated test scripts using **Java Selenium framework**.
- Worked on agile methodology with the help of tools like **Jira and Confluence**.
- Integrated automated tests with the **CI/CD** pipeline to ensure continuous testing.
- Ensured that the automation coverage includes functional, **regression, performance, and load testing**.

● LogicLadder Technologies (Gurugram)

March 2021 - July 2021

Android App Developer (Intern)

- Contributed to developing an Android app for a sustainability management technology company.
- Worked on **Bluetooth** which collects the data from difference **Sensors**.
- Built user interfaces, integrated APIs.
- Worked under the guidance of senior developers to enhance app functionality.

OTHER PROJECTS

Hello NITR (NIT Rourkela) Flutter App

- Built a *Flutter-based* app with backend completely powered by **Firebase** for **NIT Rourkela** that bridges the communication gap between faculty and students.
- Used the best possible **architecture** and **design principles**.
- Leveraged **Firebase firestore** , **firebase hosting**, **firebase functions**, **firebase Auth**.
